📄 career objective

Highly motivated Computer Science undergraduate with a strong foundation in problem-solving, programming, and building real-world projects. Possesses excellent analytical thinking, adaptability, and a collaborative mindset, with the ability to learn quickly and deliver results in dynamic environments. Seeking an opportunity to apply my skills, contribute effectively, and grow through continuous learning and hands-on experience.

🎓 Education

Intermediate, prakritik school

08/2021 – 05/2023

Patna, Bihar

"PCM – **70%**, with consistent performance in core science and mathematics subjects."

Matriculation, KCI Rajapakar

03/2020 – 03/2021 | Sarai, Bihar

Secured **75% overall**, with consistent performance across subjects

B. Tech (CSE),

Uttaranchal university

08/2023 – Present

Dehradun, Uttarakhand

"Secured 8.57 cgpa in B.Tech in Computer Science & Engineering, focusing on developing strong technical and analytical skills."

💼 Professional Experience

Frontend Developer, OBL SOFTWARES PVT LTD

06/2024 – 07/2024 | Remote

Developed responsive and interactive web pages using **HTML, CSS, JavaScript**, and **Bootstrap**.

Optimized web pages for performance and user experience.

JAVA Developer, Codec Technologies

06/2025 – 07/2025 | Remote

- Worked on projects using **Java Swing** for GUI development.
- Connected applications to **MySQL database** for storing and retrieving data.
- Gained practical experience in **object-oriented programming** and building desktop applications.
- Learned to **design user interfaces** and manage data efficiently.

Crowdfunding, Muskurahat Foundation

07/2024 – 07/2024 | Remote

- Raised **₹1,093** through crowdfunding campaigns.
- Helped plan and run fundraising activities.
- Shared campaign updates on social media to reach more people.
- Worked with the team to improve campaign results.
- Developed skills in **communication, persuasion, and audience targeting**, directly relevant to marketing roles.

🧠 Skills

Communication & Soft Skills: — Decision-Making | Leadership | Persuasion | Teamwork & Collaboration | Time Management.

Technical Skills — Programming Languages: Java, JavaScript |
Web Development: HTML, CSS, Bootstrap, MERN | **Version Control:** Git, GitHub | **DataBase:** Sql, MySQL, MongoDB

Analytical skills — Python (Pandas, Numpy, Matplotlib, seaborn)

📁 Projects

Brevio: Url Shortner 🌐, Backend (EJS, MongoDB)

04/2026 – 04/2026

Developed a full-stack URL shortener using Node.js, Express, and MongoDB that converts long URLs into short, shareable links. Implemented features like custom short codes, QR code generation, and click tracking, along with a responsive cyber-noir UI. Deployed the application on a cloud platform.

BizNova – Data Visualization Platform 🌐, JavaScript

01/2026 – 01/2026

Developed a web-based application that transforms raw CSV data into interactive charts and key business insights. Implemented features such as KPI generation (min, max, trends), automated insights, and downloadable reports. Built using HTML, CSS, JavaScript, Bootstrap, and Node.js, with plans to extend into a full-stack analytics platform.

Message System, Backend development

01/2026 – 01/2026

"Developed a server-side messaging system using Node.js, Express.js, EJS, and MongoDB to understand backend development concepts. Designed database schemas using MongoDB and Mongoose, implemented CRUD operations, and created RESTful routes for handling messages. Focused on backend architecture, routing, and dynamic rendering with EJS to manage and display user messages efficiently."

 Publications

AI in sustainable development and climate change mitigation ,
IEEE
2025

Authored a research paper on **AI in Sustainable Development and Climate Change Mitigation**, exploring AI-driven solutions for environmental sustainability, carbon emission reduction, climate resilience, renewable energy, and intelligent resource management through literature review and case study analysis.

Leveraging AI for early detection and intervention in mental health disorders in the digital age , *IEEE*
2025

Authored a research paper on **AI-driven early detection and intervention for mental health disorders**, focusing on machine learning, natural language processing (NLP), predictive analytics, wearable technologies, and ethical considerations in digital healthcare.
